# COTTON CHATS

TRADE-MARK REG U.S. PAT. OFF.

## DRAPER CORPORATION

HOPEDALE MASS.

NO. 170. DECEMBER 1916.

## DRAPER CORPORATION

assumes the publication of COTTON CHATS beginning with this issue.

We bespeak the same cordial support from our readers that was given Draper Company during the past twenty years.

On November 20th Draper Corporation succeeded Draper Company; since that date all business has been in the name of the new Corporation.

Our home address and office is

HOPEDALE MASSACHUSETTS

Southern Office

188 SOUTH FORSYTH STREET ATLANTA GEORGIA

# NORTHROP LOOM SHUTTLES

In each package of our patented shuttles the following notice has been enclosed:

**THESE SHUTTLES ARE SOLD AND LICENSED TO BE USED ONLY IN LOOMS MADE BY DRAPER COMPANY AND ITS LICENSEES.**

It has been reported to us that, in some instances, this restricted license under our patents has been violated and our patented shuttles have been used in looms made by parties other than Draper Company and its licensees.

We call the attention of the trade to the fact that such use is a violation of the restriction above quoted and is a direct infringement of our patents.

Our patented shuttles are especially designed and adapted for use in our own looms, and we shall be obliged to enforce our rights against all persons who persist in using them in looms other than those made and licensed as above.

# OUR 1917 CALENDARS

were mailed early in December so that practically all should have been delivered before the rush of the holiday mails.

Memorandum book inserts for 1917 were mailed under full letter postage with request to local postmaster to be returned if not delivered.

Our mailing lists are intended to include cotton mill officials and overseers of the various departments using our products.

Parties desiring our Cotton Chats and other printed matter will kindly keep us advised of changes in address or official position.

# THE WORLD MOVES

in the peaceful circles of cotton manufacturing as well as in foreign war zones and trenches.

From the experiment of twenty-five years ago the Northrop Loom has become the necessity of today.

Northrop Looms reduce the cost of weaving 50 to 75 per cent. while enabling weavers to earn more pay.

With the above food for thought we wish our readers

## A Happy and Prosperous New Year
